## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-28 are allowed.
2. The following is an examiner's statement of reasons for allowance: none of the prior art of record is considered to teach, suggest or render obvious the invention of claims 1-28.

In particular of a single, self-contained, replaceable planar solid oxide fuel cell as defined in the instant claims wherein the gas inlets and outlets (claim 1) or fuel and oxidant inlets and outlets (claim 16) are affixed to respective interconnects.

In each of Poeppel and Maricle the individual fuel cells are not self-contained nor does each fuel cell comprise the gas inlets and outlets as recited in the independent claims. Rather reactant gases are flow into and out of the fuel cells via manifolds which extend over the entire stack. In such an arrangement, the fuel cells are not construed to be self-contained since they are all open to the respective common manifolds.

In Katz, the fuel cell system is not disclosed to be a solid oxide fuel cell system and fuel cells in the fuel cell stack are not self-contained (Constituting a complete and independent unit in and of itself).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
